NIKITA SOLOVYOV
Junior QA Engineer (Manual & Automation)
solo.mykyta@gmail.com | [Telegram](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [GitLab](#) |

📝 Professional Summary

Result-driven Junior QA Engineer with hands-on experience in manual testing of Web and Mobile applications. Completed 15+ practical projects, including checklists, test cases, bug reports, and API testing.
Strong analytical skills, attention to detail, and readiness to deliver high-quality results in real-world projects.
Proficient in automation (Python, Selenium, Pytest, CI/CD) and performance testing (JMeter, k6), expanding testing coverage and efficiency.

⚙ Skills

- **Testing:** Manual, UI, Mobile, API, Regression, Smoke, Integration

- **Test Documentation:** Checklists, Test Cases, Bug Reports

- **Databases & SQL:** MySQL Workbench

- **Tools:** Jira, TestRail, Figma, Chrome DevTools, Postman, Fiddler

- **Automation & CI/CD:** Python, Selenium, Pytest, Docker, GitHub Actions, GitLab CI, Allure

- **Performance Testing:** JMeter, k6

- **Version Control:** Git, GitHub, GitLab

📂 Key Projects

1. **[Documentation — KS-Trans](#)**
   Created full QA documentation for a real-world website: **checklists**, **test cases**, and **bug reports** with screenshots confirming testing.

2. **[Rozetka Mobile Testing](#)**
   Manual testing of the mobile version of **Rozetka.ua** with **16 test cases**, **4 checklists**, and 30+ screenshots.

Included UI, API, cross-browser, viewport, and network condition tests using **Android Studio** emulator, **Fiddler**, **BrowserStack**, and **Chrome DevTools**.

3. **[API Testing — FakeStoreAPI](#)**
   Designed and executed **30 automated API tests in Postman**, with automated runs via **Newman** and detailed reports.

4. **[SQL Practice — Library DB](#)**
   Built and tested a database with books, readers, and loans. Designed SQL queries to validate data integrity in **MySQL Workbench**.

```
SELECT, WHERE, ORDER BY, LIMIT, JOIN, GROUP BY, HAVING,
subqueries, EXISTS, UNION, INSERT, UPDATE, DELETE.
```

5. **[UI Automation — Selenium (Docker + Allure)](#)**
   Automated UI testing using **Selenium** and **Pytest**, implemented **Page Object Model** (POM) and **parameterized** tests. Integrated with **Docker** and **CI/CD** pipelines for **Allure** reports and **GitHub Pages** publishing.

6. **[Performance Tests — JMeter & k6](#)**
   Developed **load and stress testing scripts** for web services, automated result collection, and publishing to GitHub Pages.
