📝 Professional Summary

Junior QA Engineer focused on automation testing, API, CI/CD, and performance testing. Completed 15+ practical projects including UI/API automation, Python scripting, CI/CD pipelines, performance testing, and test documentation. Detail-oriented, quick learner, ready to contribute to real-world QA projects.

⚙️ Skills

- **Automation Testing:** Python, Pytest, Selenium (POM), Allure

- **API Testing:** Postman, Newman, Requests

- **Manual Testing:** Test Cases, Bug Reports, Checklists

- **Databases:** MySQL Workbench

- **CI/CD:** Docker, GitHub Actions, GitLab CI

- **Performance Testing:** JMeter, k6

- **Test Management:** Jira, TestRail

- **Version Control:** Git, GitHub, GitLab

💻 Key Projects

1. Documentation — KS-Trans
Documentation on real website, showcasing checklists, test cases, bug reports.
[View Project](#)

2. GitHub Actions Docker Pipeline
Automation of building/testing/publishing Docker images.
[View Project](#)

3. Postman Newman API Tests
Automated API testing using Postman + Newman + GitHub Actions.
[View Project](#)

4. UI Automation — Selenium
UI automation using Selenium + Docker. CI/CD: container build, test execution, Allure reports.
[View Project](#)

5. Performance Tests
Load testing using JMeter and k6 with automatic results publishing.
[View Project](#)

6. Python CI/CD Project
CI/CD automation for Python app (unit, integration, smoke, e2e) using GitLab CI.
