NIKITA SOLOVYOV

Junior QA Engineer (Automation)

solo.mykyta@gmail.com | [Telegram](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [GitLab](#)

📝 Professional Summary

Result-driven **Junior QA Engineer** specialized in **automation testing**, API, CI/CD, and performance testing.
Completed **15+ practical projects**, including **UI/API automation**, Python scripting, CI/CD pipelines, performance testing, and full test documentation.
Strong analytical mindset, detail-oriented, and ready to **deliver high-quality results in real-world QA projects**.

⚙ Skills

- **Automation Testing:** Python, Pytest, Selenium (POM), Allure

- **API Testing:** Postman, Newman, Requests

- **Manual Testing:** Test Cases, Bug Reports, Checklists

- **Databases:** MySQL Workbench

- **CI/CD:** Docker, GitHub Actions, GitLab CI

- **Performance Testing:** JMeter, k6

- **Test Management:** Jira, TestRail

- **Version Control:** Git, GitHub, GitLab

🧩 Key Projects

1. [Documentation — KS-Trans](#)
Created full QA documentation for a real website: checklists, test cases, and bug reports, with screenshots confirming testing.

2. [GitHub Actions Docker Pipeline](#)
 Automated building, testing, and publishing of Docker images via CI/CD pipelines.

3. [Postman Newman API Tests](#)
 Automated API testing with Postman & Newman integrated with GitHub Actions for continuous execution.

4. [UI Automation — Selenium (Docker + Allure)](#)
 UI automation using Selenium and Docker. CI/CD pipeline: container build, test execution, and Allure reports publishing.

5. [Performance Tests — JMeter & k6](#)
 Load and stress testing scripts for web services, with automated result collection and publishing.

6. [GitLab CI Python CI/CD Project](#)
 CI/CD automation for a Python application: unit, integration, smoke, and end-to-end tests using GitLab CI.
