NIKITA SOLOVYOV

Junior QA Engineer (Manual & Automation)

solo.mykyta@gmail.com | [Telegram](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [GitLab](#)

📝 Professional Summary

Result-driven Junior QA Engineer with hands-on experience in **manual testing of Web and Mobile applications**. Completed **15+ practical projects**, including **checklists, test cases, bug reports, and API testing**.

Strong analytical skills, attention to detail, and readiness to **deliver high-quality results in real-world projects**.

Proficient in **automation (Python, Selenium, Pytest, CI/CD) and performance testing (JMeter, k6)**, expanding testing coverage and efficiency.

⚙ Skills

- **Testing:** Manual, UI, Mobile, Regression, Smoke, Integration

- **Test Documentation:** Checklists, Test Cases, Bug Reports, Test Plans

- **Databases & SQL:** MySQL Workbench (query writing & validation)

- **Tools:** Jira, TestRail, Figma, Chrome DevTools, Postman

- **Automation & CI/CD:** Python, Selenium, Pytest, Docker, GitHub Actions, GitLab CI, Allure

- **Performance Testing:** JMeter, k6

- **Version Control:** Git, GitHub, GitLab

🧩 Key Projects

1. [Documentation — KS-Trans](#)
Created full QA documentation for a real-world website: checklists, test cases, and bug reports with screenshots confirming testing.

2. [API Testing — FakeStoreAPI](#)
Designed and executed API test collection in Postman with automated runs via Newman and detailed reports.

3. [SQL Practice — Library DB](#)
Built and tested a database with books, readers, and loans. Designed SQL queries to validate data integrity in MySQL Workbench.

4. [UI Automation — Selenium (Docker + Allure)](#)
Automated UI testing using Selenium and Pytest, integrated with Docker and CI/CD pipelines for Allure reports and GitHub Pages publishing.

5. [Performance Tests — JMeter & k6](#)
Developed load and stress testing scripts for web services, automated result collection and publishing to GitHub Pages.
